PROJECTS

Job Portal

- Developed a backend application using **Node.js, Express.js, Postgres, Redis, Socket.io, Razorpay**.
- Implemented **real-time updates** and **chat** using **Socket.IO** with **Redis Pub/Sub**, enabling horizontal scaling across multiple server instances.
- Developed a **subscription** module with **Razorpay**, enabling recruiters to upgrade between plans with seamless recurring payments.
- Designed secure APIs with **JWT-based authentication** and **role-based access** control.

Project Manager

- Developed a full-stack task management application using **MongoDB, Express.js, React.js, and Node.js (MERN)**.
- Enabled users to **sign up, log in**, and manage projects, with functionality to create, update, and delete tasks within projects.
- Integrated **JWT-based authorization** to protect all CRUD operations.
- Wrote backend **test suites** using **Jest** to ensure API reliability and maintainability.

Real-time Chat App

- Built a real-time chat application using **Node.js, Express.js, and Socket.IO**.
- Implemented **room-based chat functionality**, allowing users to join specific rooms and exchange messages in real time.
- Managed real-time user connections and message delivery in chat rooms using Socket.IO.
- Displayed active user lists and enforced unique usernames to enable conflict-free communication.
